

Recreational Fishing Catch - South West Region (western Part)

Estimated non-bait catch number for the year beginning May 2000.

When reading this map it should be noted that the statistical areas vary greatly in extent and encompass varying amounts of fish habitat. Fishing is usually quite patchy in its distribution within a statistical area. The seaward boundary of marine statistical areas has been terminated at a depth of 1500 metres.

Marine and estuarine

Number of fish (non-bait)

- 3,000 - 68,000
- 69,000 - 190,000
- 200,000 - 460,000
- 470,000 - 590,000
- 600,000 - 910,000
- 920,000 - 3,100,000

Inland freshwater

Number of fish (non-bait)

- 0.000000000 - 1,000
- 1,100 - 15,000
- 16,000 - 29,000
- 30,000 - 58,000
- 59,000 - 310,000
- 320,000 - 790,000

No data

Catch Composition

- BAITFISH
- FINFISH
- CRABS/LOBSTERS
- PRAWNS/YABBIES
- CEPHALOPODS
- MOLLUSCS
